informal experts predominate in the form most in the rural areas. Informal experts in rural areas usually have less education than formal experts. They are often older and have more experience in agriculture. They are usually self-employed or work for small-scale farmers. They provide practical advice on crop management, animal husbandry, and soil conservation. They also provide information on market prices and government policies. Formal experts, on the other hand, are usually employed by government agencies or non-government organizations. They provide theoretical knowledge and research-based advice. They also provide information on scientific methods and modern technologies. The two types of experts complement each other, providing different types of knowledge and skills to farmers.

Informations sur le produit en bois massif et placage naturel: Le bois est un produit vivant de la nature qui peut varier en couleur et structure. Il se rapproche des propriétés du bois naturel de la nature qu'il est destiné à remplacer. Les changements peuvent survenir au cours du temps, en fonction de l'environnement dans lequel il se trouve. Ces variations sont essentielles pour assurer la durabilité et la qualité du produit.

gefüllter, ziemlich trockener und verwitterter Hintergrund. Dies ist durch die dichten, etwas unregelmäßigen und spärlichen Wurzelausläufer gekennzeichnet, welche die Rinde des Stammes verdecken. Der Stamm ist oben etwas aufgewölbt und verzweigt sich in zwei Hauptäste, welche wiederum in zahlreiche kleinere Äste verzweigen. Die Rinde ist graubraun, glatt und mit einigen kleinen, runden, hellroten Flecken besetzt. Einzelne Stellen sind mit einem braunen, schleimartigen Substrat überzogen, welches aus dem Zersetzen der Rinde besteht. Die Rinde ist im Querschnitt weißlich, zeigt aber in den äußeren Teilen eine schwach orangefarbene Färbung.
